# Installation auf Homeserver

**Auf Homeserver:**

```
# Wireguard installieren
  sudo apt update
  sudo apt install -y wireguard

# Keys generieren
  sudo -i
  cd /etc/wireguard
  umask 077
  wg genkey | tee homeserver-private.key | wg pubkey > homeserver-public.key

# Keys anzeigen und notieren!
  cat homeserver-private.key
  cat homeserver-public.key
```

**Config erstellen:**

```
sudo nano /etc/wireguard/wg0.conf
```

**Inhalt:**

```
[Interface]
Address = 10.100.0.2/24
PrivateKey = <HOMESERVER_PRIVATE_KEY>

[Peer]
PublicKey = <HETZNER_PUBLIC_KEY>
Endpoint = 46.224.8.110:51820
AllowedIPs = 10.100.0.1/32
PersistentKeepalive = 25
```

**Akivieren:**

```
sudo systemctl enable wg-quick@wg0
sudo systemctl start wg-quick@wg0
```

```
sudo systemctl status wg-quick@wg0
```
