

Installation auf Homeserver

Auf Homeserver:

```
# Wireguard installieren
sudo apt update
sudo apt install -y wireguard

# Keys generieren
sudo -i
cd /etc/wireguard
umask 077
wg genkey | tee homeserver-private.key | wg pubkey > homeserver-public.key

# Keys anzeigen und notieren!
cat homeserver-private.key
cat homeserver-public.key
```

Config erstellen:

```
sudo nano /etc/wireguard/wg0.conf
```

Inhalt:

```
[Interface]
Address = 10.100.0.2/24
PrivateKey = <HOMESERVER_PRIVATE_KEY>

[Peer]
PublicKey = <HETZNER_PUBLIC_KEY>
Endpoint = 46.224.8.110:51820
AllowedIPs = 10.100.0.1/32
PersistentKeepalive = 25
```

Aktivieren:

```
sudo systemctl enable wg-quick@wg0
sudo systemctl start wg-quick@wg0
sudo systemctl status wg-quick@wg0
```
