Wichtige Befehle

Container

```
cd ~/overleaf
docker compose ps
docker compose logs app
docker compose logs mongo
docker compose restart
```

MongoDB ReplicaSet:

```
docker exec overleaf-mongo mongosh --eval "rs.status()"
```

Troubleshooting:

```
# Bei "Transaction" Fehler
docker exec overleaf-mongo mongosh --eval "rs.initiate({_id: 'rs0', members: [{_id: 0, host:
'mongo:27017'}]})"
docker compose restart
```
